to Immigration Reform  
to Economic Equilibrium,

## Executive Summary

### Economic Emancipation Forum - Ecoforum

Ecoforum was founded in 2013, as the admiral or herald of ordinary people of all faith in all spheres in Africa, especially South Africa. In which, our verbiage and make-up is influenced by the original origin of all adage, maxims and creation, of all human kind – the 'Holy Scriptures.

The inception of a new voice 'crying in the wilderness' in order to restore the posture and stability of our people from the original economic context, and promises made to the patriarch of this movement in the beginning of times.

As a movement, we discovered that democracy without the first-mentioned theocratic foundational principles, is subjected to destruction and failure.

### Ecoforum is a tripartite party consists of three embers:

- a) Economic Emancipation Forum, abbrv. ECOFORUM – The 'Political Party'.
- b) Ecoforum Trade Union of Southern Africa, abbrv. ETUSA – The 'Trade Union'.
- c) Ecoforum Financial Trust, abbrv. EFT – The 'Trust'.

Economic Emancipation Forum - Ecoforum is fully registered with the Independent Electoral Commission (IEC) at the National Level, Reference no. 1260 and are in preparation to contest on the 2019 National & Provincial Elections, period.

**Our approach is theocratic and economical.**

## About US

- Ecoforum** shall be the trusted 'advisor' and a real voice for the people of South Africa, the 'change' to effect change.
- Ecoforum** shall champion 'community regeneration' through revaluing and appreciating the role of churches and traditional leadership in our communities given the needs today.
- Ecoforum** shall champion 'proactive governance' required to develop government early warning system to improve its effectiveness in service delivery. As we redefine the future, Ecoforum will re-evaluate country's relationships economically with other countries, entities and individuals to establish its relevance and benefit to our country.
- Ecoforum** has 'zero tolerance' on anything that seeks to promote monopolistic behavior in our approach to inclusive economy of South Africa.
- Ecoforum** is a 'Building Party', not an 'opposition party' in its countenance and must be articulated as such. Ecoforum strongly believes every responsible South African has something to offer this country.
- Ecoforum's** main objective in 2019 is to deploy 25% of 400 Members of Parliament proportional, to champion the 'Doctrine of Separation of Powers'.
- Ecoforum** modalities: (1) Restitution, (2) Reformation & (3) Reiteration.

## About US - Ecoforum's Three Theocratic Appeals:

1. Ethos & Pathos
2. Logos

### 1. Our 'Ethos' & 'Pathos'

Our values and principles are derived from the biblical context of the promises made to Confidant Moses of the economic conditions of the promised land stated; "A land flowing Milk and Honey." Interpretation; literally there is no land that could flow 'Milk and Honey', basically this needs a tested philosophical interpretation. It is only a Cow that models the production of Milk, so one needs to learn the attribution of the Cow as a domestic governor of animals; his strength, beat, servitude and governance.

- Honey is produced by bees. It has a dual meaning of interpretation; sweetness of the word and to bribe or sweeten the deal (Holy Scriptures, Leviticus).
- Our principles are to serve the nation with integrity and relentlessness, selflessly, incorruptible and indispensable. The negative interpretation of 'Honey' is ruled out by (Holy Scriptures), indicating the damage that this sweetness could do to the bread, so, we are fully aware of the corruption and self-gain materialism leadership, and are totally against the act.

### 2. Logos (Word – Reason – Plan) : 'Prophetic Governance' – "Let there be".

## Why Us

**Ecoforum** is the new force of 'national union government' emerging during the national emergency of a broad coalition government.

**Ecoforum** subscribes fully to the 'Doctrine of Separation of Powers' as decoded in the Book of Law, "Isa. 33.22", in order to supersede a dictatorial, autocratic and new order system.

**Ecoforum** shall serve as the 'Inclusive Economy Champion', leading through its people.

**Ecoforum** interdependent link strategic pillars are:  
1) Economy  
2) Education  
3) Social

## Why US – 12 Executive Orders (EO)

- EO – 01: Re-Industrialization of peripheral industries.
- EO – 02: Reprioritization on SA Primary Sector Economies such as:  
a) Agriculture  
b) Mining  
c) Financial Services
- EO – 03: Reprioritization on SA Secondary Sector Economies such as:  
a) Manufacturing  
b) Infrastructure  
c) Engineering
- EO – 04: Reinforce the importance of modern Techno-Economies such as:  
a) Blockchain  
b) Cryptography
- EO – 05: Revitalization of economic active Cooperatives.
- EO – 06: Revitalisation of Social grants programme, e.g. Street social grant, Pension grant, Disability grant, Children grant, etc.
- EO – 07: Reformed South African based-centric Education system.
- EO –08: Integrated and transparent government systems.
- EO –09: Food Security and Poverty Eradication.
- EO –10: Reform SA Health System.
- EO –11: Redress Financial Systems.
- EO –12: Prioritize Safety and Security.

## Growth Plan of Action – GPA2100

**Ecoforum** alludes GPA2100, meaning, “Growth Plan of Action” for a period of hundred (100) years.

**Ecoforum** adopted a preliminary GPA2100 in April, 29, 2017 in Tshwane, Region 2 –Mandela Hall, Hammanskraal upon the strength of our members and confidants. (adopted, 29/04/2017, Tshwane – Mandela Hall. GPA2100 preliminary draft cited).

**Ecoforum’s** National Inaugural Conference was held on the 16 June 2018 in Tshwane.

**Ecoforum** GPA2100 white paper characteristics are:  
**Provocative** –must interrupt the status quo.  
**Grounded** –not fanciful but grounded to reality and built upon our people.  
**Really desired** –reach out to the desired emotions and meet a real need.

**Ecoforum** Campaign ‘Logos’ –“Let there Be” e.g. “Let there be”  
 – Prophetic Governance  
 “Let there be” –Economic Inclusion

**Ecoforum** Campaign ‘Slogan’ –‘Campaign 2019 RSA’ - SA BACK TO GOD e.g. “SA BACK TO GOD” voteEcoforum2019.

## Growth Plan of Action – GPA2100

Ecoforum Campaign ‘Slogan’ – ‘Campaign 2019 RSA’ - **SA BACK TO GOD**  
 e.g. SA BACK TO GOD voteEcoforum2019.

**NB: All models used on the pictures are utilized for manufacturers discretion.**

**Red** – Redemptive Red

**Royal Blue** - Royalty

**Gold** – Divine Nature

## **GPA2100 - ECONOMY**

### **1. Agriculture (Primary Sector)**

- Ecoforum proclaims, “Food is a human right”.
- The value of organic style agriculture.
- The value of Biodiversity to Food Security as an insurance policy to guarantee the human food supply.
- Industrialize Family Agriculture (Farming).
- Embrace Pastoralism for the provision of local markets, urban and rural food security.
- Fight against Genetically Modified Crops (GMC).
- South Africa needs a long-term ecological production, equitably available supply and the availability of food.
- Ecoforum initiates Community Gardens, Landcare and Local Markets.
- Improve youth participation in agriculture.
- Protect in perpetuity prime agricultural land and the agricultural water supply.
- Make policy compliance for agricultural production and supply rest on the principle of ecologically sustainable development.
- Use a precautionary approach to health in approving new food production and processing technologies such as genetic engineering and irradiation.
- Generously fund research that supports ecologically sustainable production and organic systems.
- Ensure fair economic returns to farmers in spite of fickle weather and trade deals.
- Use tax and other mechanisms to subsidise healthy food for the chronically ill.
- Make healthy food preparation and eating a part of all education programs.
- Ecoforum preserving God given life in nature’s diversity helps reveal the plenitude of God.

## **GPA2100 - ECONOMY**

### **2. Mining Sector (Primary Sector)**

- Local development of mining systems and infrastructure.
- Promote localisation of the full cycle on mineral production to create jobs while developing skills and technologies required.
- Promote and support co-operative entrance in the mining sector.
- Review of mining relevancy to the challenges of today and drive inclusive economy.
- Ecoforum promotes health and safety in all mines.
- Raise South African mine owners.
- Establish and further legislate the cutting and polishing of precious stones throughout South Africa.

### **3. Financial Service Sector (Primary Sector)**

- Financial institutions operating in South Africa need to reflect that through ownership and ensure its relevance to the challenges of today facing South Africa.
- Promote co-operative banking to allow new entrance while driving inclusive economy.
- Ecoforum supports the adoption of new technologies that seeks to revolutionize this sector to improve transparency and the economy of this country.
- Promote a united state of South Africa for a good course to drive local investment towards strategic priorities.
- Local SMME aligned program towards economic growth strategic programs.
- Redress of banking systems.
- Reimburse all provident and pension monies of the former employees of the Bantustan which were misappropriated, maladministered and heisted.
- Ecoforum defies Banks propaganda to drive a capitalistic agenda

## **GPA2100 - ECONOMY**

### **4. Technology**

- Invest in research, innovation and development strategic to our economic priorities.
- Promote consumption of local IT products, services and solutions.
- Application of blockchain in establishing great governance for South Africa.
- Ecoforum promotes and endorses digitization as a vehicle of open economy participation.
- Ecoforum shall master skills development to corporate business to recycle unskilled labour.
- Ecoforum believes that technology should be well introduced to our older generation through education, not imposed.

#### **4.1 Blockchain Technology**

- i. The application of Blockchain technology in government.
- ii. Blockchain will allow the government of Ecoforum to deal and relate with business and citizens in a transparent manner. This will emphasize transparency and ring back the trust between government and citizenry.
- iii. Blockchain application on the following sectors:

#### **a. Blockchain: Elections and Voting**

Blockchain technology will assist in voter registration, verification and voter counting. The current voting system has quite a lot of loopholes of which one of them is the duplication of votes. The votes are in paper form and lots of challenges can develop, in recent history we have seen hijacking of vehicles moving the votes. With Blockchain, voting will be in a digital form. There will never be duplication of votes as the system is transparent, each and every vote will

## **GPA2100 - ECONOMY**

be recorded in real-time from the genesis block till the recent activity. This will allow voters to truly exercise their democratic rights as they will be voting at the comfort of their homes where they are safe from political influence.

### **b. Blockchain: Housing and Title Deeds**

As Blockchain is a distributed ledger that means it will contain information and true records and dates of title deeds. Government policies and administration changes over time. The dependency of office and administration has failed decimally in the past and it is subject to bribery and the creation of fraudulent records. So many people that are rightful owners of properties has been cheated out of their inheritance due to this maladministration.

Ecoforum is intending in adopting and applying this technology as the system cannot be hacked, tampered and edited without the other users being aware of that activity. The department of Housing and rural development will adopt this public ledger storage of information to grant the rightful applicants houses. In a recent challenge that we have as a society is that many foreign nationals are receiving low cost houses (RDP) instead of the people that have applied. Ecoforum will introduce such governance that is highly effective and speaks the true reflection of Quality Assurance (QA).

### **c. Blockchain: Department of Health & Safety**

Blockchain will allow Doctors and medical professionals to share and have access to medical records without files. The minute they know the name and surname or identity number of the patient they could simply access information on Blockchain and that could speedily save a life in a case of emergencies. The Ecoforum's approach is to put together

## **GPA2100 - ECONOMY**

great systems in place in order to give world class medical services to the citizens of this country. The earlier the doctors are able to access the medical history, the better the diagnosis. This application of Blockchain into the health system will save a lot of lives and will be relevant towards handling dread diseases.

### **d. Blockchain: Law & Order**

This application shall play a vital role in the Police services and Courts of Law. This would minimise corruption and bribery, and loss of dockets and cases. Ecoforum has a solution of an incorruptible systems.

### **e. Blockchain: Agriculture – Imports and Exports**

The Blockchain technology will restore back quality into agricultural trade, when exported and importing goods and rendering services. This application will allow both the buyers and sellers to link and interact. Backlogs will be indeed a thing of the past and the movement of goods will be tracked as the result of Ecoforum's government meets the turn around strategic time allocated.

The trace of originality will be emphasized and history will be the outmost relevance in fulfilling the needs and standards of both the exporter and importer. For example, Fishing; The retailer or wholesaler shall know from which lake was the fish caught, the date, methods applied to catch the fish, its packaging and the mode of transport till it reach relevant destination. This shall give government or private business a new methodology of retracing the steps in a case of investigation and also to know exactly where the special attention is needed to improve quality that our society needs and deserves.

## **GPA2100 - ECONOMY**

### **f. Blockchain: Mining Industry**

Blockchain application is very relevant in the mining industry, particularly the diamond mining. In a quest to reduce blood diamonds, Ecoforum will encourage the industry to register the precious stones on blockchain where buyers and jewellers can trace the history of the stone. These facts will reduce the blood diamonds and illegal mining entering the market. This process shall encourage legitimate ways of the business industry and regulations adhered to the mining industry.

### **5. Transport**

- Invest in public transport to facilitate mobility and stimulate trade.
- Promote an integrated transport system to achieve efficiencies which indirectly contribute to the economic growth.
- Improve transport infrastructure to ensure effectiveness and eliminate fatalities.
- Embrace our traditional taxi industry as a major transport industry for South Africans and evolve with the industry mutually and technological. Create a trust fund dealing with taxi owner finance, in order to assist in purchasing new or more vehicles for the industry's growth.
- Introduce 'Water Jet Fairey' in South Africa for the ocean economy (tourism, transporting of goods) and its convenience.

### **6. Education**

- Education system need to prioritise the economic priority related skills.
- Early Childhood Development (ECD) should incorporate the following:
  - i. The Creator and the Creation (Natural Law)
  - ii. Child's Portfolio of Evidence (to identify the child's expertise at an early age)
  - iii. Ubuntu (including all South African Languages)

## **GPA2100 - ECONOMY**

- iv. Financial Literacy
- v. Computer Literacy
- vi. Agriculture

- Educators Competence.
- Sports Education.
- Dual Education – Theory & Practical (concurrent).
- Reform Education by legislating Home Schooling throughout South Africa.

### **Reasons why home schooling:**

1. It may be for philosophical or religious reasons or due to their own positive experiences of home education.
  2. This could be down to any child, even those having special needs or not coping with life at a large secondary school.
  3. This will award parent to make life choices for their children as they are the first legal teachers.
  4. This shall empower other parents and guardians with skills and competence in order to educate their children professionally and serve as a method of job creation.
- Preparatory programs for secondary basic education learners.
  - Introduction of an SA based curriculum directive to South Africa's economy.

## **7. Social**

Back to basics, Reiterate theocratic ideologies pertaining the livelihood of our people and Ubuntu.

## GPA2100 - ECONOMY

### • Social Infrastructure

1. Water as a basic necessity and human right
2. Establish Household Municipal
3. Rural Development
4. Smart Local Transformation
5. Smart City Transformation
6. Quality Assurance
7. National Censorship (Household Statistics)
8. Constitution Reform

We are deeply thankful for the inception of our Constitution and strongly believe that there is a need to amend and reform the Constitution of South Africa for the betterment of our country.

### • Social Welfare

1. Ecoforum shall introduce Street Care Grant, i.e. No more sleeping on the streets. We will legislate a prohibition against any person sleeping on the street, so it may not be an alternative home. No South African deserves to sleep on the streets. Shelter shall be uphold as a basic need.
2. Ecoforum shall open community care centres to accommodate this families and kids, in order to restore them back to the national system.
3. Social grants bill amendment, through the guidance of National Censorship. Statistics should assist the government in mastering the micro-economy, for allocation and distribution of grants. For example; A family of 10, a grandparent with surviving grandchildren who happen to have children, R1690 cannot change their status quo. A necessary censorship must be audited, to interdependently involve other relevant departments to fully assist our families through all systems acquired, e.g. Education, Health, etc.

## **GPA2100 - ECONOMY**

4. Social grant refocus to people living with Albinism – in order to assist our people with skin care and other.
5. All social grants must have insurance, for future dispensation to prospective families. A percentage shall be deducted for future financial security of the families or individuals.

### **• Poverty Eradication**

Ecoforum is making poverty history. Effective poverty alleviation without hurting the poor. Love your neighbour!

- i. Ecoforum proclamation: “Good News for the Poor”.
- ii. When Ecoforum announces good news to the poor, this news is primarily spiritual, but has concrete economic and social implications.
- iii. An injury to any member of the human family is an injury to the very body of the human family.
- iv. Poverty eradication shall be expedite through biblical principles, for the Book of Law entails equality but not seldom, in gifts and talents, in order to promote trading on to another.
- v. Income inequality, often times, pits the rich against the poor. In some cases, it’s true – the rich benefit at the expense and exploitation of the poor. However, coupling sound economic thinking with the metanarrative of scripture points us to the proper biblical perspective of income inequality.
- vi. At the core of poverty alleviation is igniting God-given dignity into the hearts of the poor by empowering them to be who the creator, created to be. Our efforts can’t just be monetary.
- vii. Poverty alleviation is about relationships. God loved and cared for the poor, and He calls us to model His example.

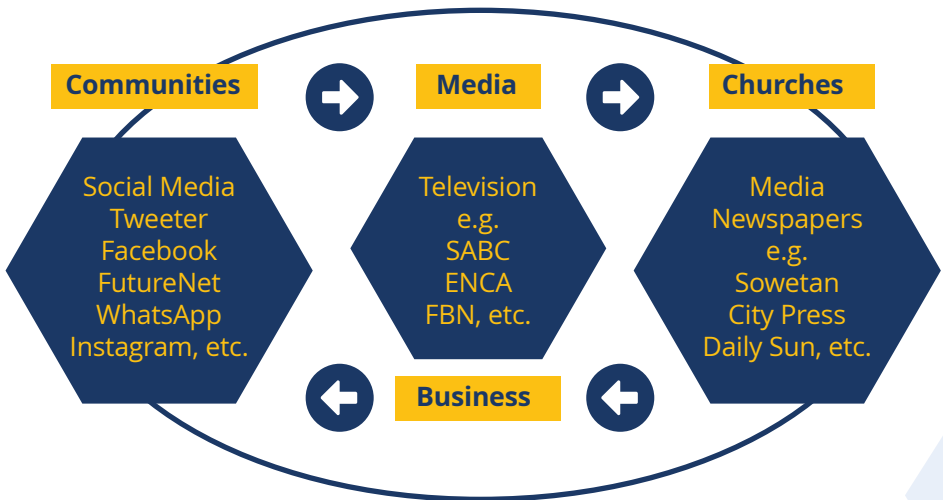

## **GPA2100 - ECONOMY**

- viii. Poverty alleviation is the people's responsibility. It is the job of all of us, people of all faith, to care passionately and genuinely for the poor. The church institution must step up to their responsibility and be the first line of offense in addressing poverty.
- ix. The fight to end poverty starts in your community. Its starts with building long-term relationships. Getting your hands dirty, and addressing real needs.
- x. The Book of Law is the only tool that has the power to transform heart, mind and soul.
